Tradition in taste, tradition in craftsmanship: the Belgian meat suppliers listen carefully to your needs to offer you personalized service and the most delicious fine meats - straight from the heart of Europe.

**Recipe
for success**

Ask yourself

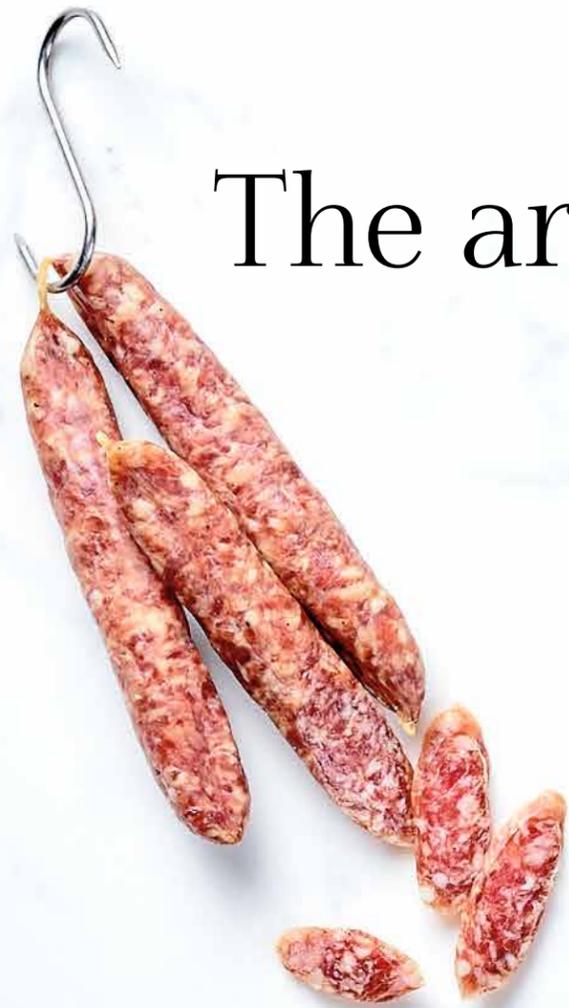

What do Belgian fine meat products have in common with beer and chocolate, waffles and fries? In addition to the fact that they are Belgian, they all share the same recipe for success: a combination of product quality and craftsmanship, without compromise.

**Fine meats,
fine people**

Consider this

Why should you join forces with the Belgian meat suppliers? Again, it's the combination that makes the difference. Focused on flexibility and fully dedicated to service, the Belgian meat suppliers are committed to making life easy for all the people they work with.

modern craftsmanship

It isn't just about the taste. The assurance of flawless production, security of supply and the ability to respond quickly and flexibly to expected and unexpected situations are your concern as well. That guarantee of modern craftsmanship is provided by the Belgian suppliers.

State-of-the-art

Ask yourself

Do artisanal products match with modern-day production techniques? Oh yes, they do. The Belgian fine meats sector has invested heavily in an advanced hygienic approach and sophisticated automation. For good reason, because this enables the suppliers to diversify their offer (in products and packaging) and to respond quickly to your needs.

Straight from the heart

Consider this

Can small family enterprises make a great difference in such a modern environment? Oh yes, they can. Their experience, know-how and authentic recipes have been passed on from generation to generation, and seasoned with state-of-the-art techniques, of course. When knowledge converts into know-how, and experience turns into expertise, you know you're in good hands.

quality assurance In constant control

Protecting the consumer's health is key in European meat production. And that involves food safety, animal welfare and transparency without compromise. Thanks to a unique approach, the Belgian fine meats sector is a paragon of European food safety.

Sustainability

In an industry that is fully committed to addressing the challenges imposed by climate change, the issue of sustainability is a topic of paramount interest to meat producers. The European meat sector continually invests in its production systems to improve environmental protection all along the supply chain.

Where safety meets traceability

Ask yourself

With such strict European regulations, what makes fine artisanal meats from Belgium stand out? The Belgian Federal Agency for the Safety of the Food Chain (FASFC) has created a framework that guarantees food safety throughout the chain: from breeding to transportation, slaughtering, cutting, processing, packaging, exportation and consumption. Moreover, every meat product is fully traceable, all the way back to the animal's feed.

Consider this

Do Belgian/European standards comply with your local regulations? Certainly! All our products are covered by the following CN codes:
